Manufacturer Exporter of Hand Tool,
Hand Tool Pliers & Jewelers Tool Equipments

TM-5131
Pronged Holding Tweezers

TM-5114 Ring Set Soldering Tweezer
SOLDERING CROSS ACTION TWEEZERS (BENT)

TM-5120 Inside Clipper

TM-5104 Dapping Die
This dapping die has 17 hemispherical depressions from $1/8"$ to $7/8"$ by $1/16"$, plus $1"$, $1-1/8"$, $1-1/4"$ and $1-3/8"$.
Depressions match punches and have a satin smooth finish. Die is made of high grade, properly hardened steel and measures 2" square.

TM-5510 Parts Cleaning Basket
Holds small parts during cleaning

TM-5108 Disc Cutting Sets
Made of high carbon tool steel, these cutters will produce perfect circles from soft metals up to a 18 gauge thickness. Each disc cutter set is individually machined and tempered to perfection. Each punch has a shoulder ring to prevent it from falling through the base. 5 individual cutters in increments of $1/8"$ Inches: $1/2"$, $5/8"$, $3/4"$, $7/8"$, $1"$ Millimeter: 12.69, 15.87, 19.08, 22.18, 25.40
Wood base included

TM-5107 Dapping Punch Sets
Dapping Punch Set 24Pc + Dapping
Cube 65x65mm in Steel from 3/60

TM-5109 Double End Pin
Vise 11 Double End Pin
Diamond Coated Bead
Reamers

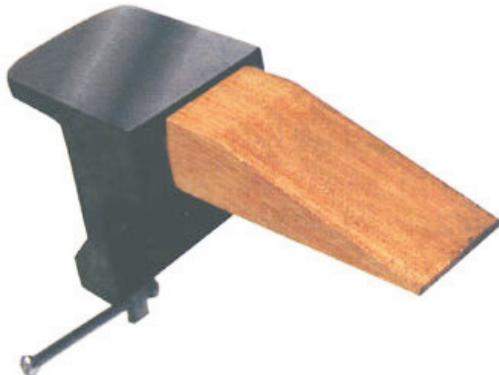

TM-5105 Dapping Die and Design Block

TM-5106 Dapping Die and Design Block

TM-5101 Bracelet Mandrels
Four steps graduate from 1-3/4" x 2" to
2-1/2" x 2-3/4" (44 x 50mm to 63 x 70mm)

TM-5103 Combination Bench Pin and Anvil
Combination Bench Pin with Anvil. Easily clamps
to the workbench.

42mm height, 105mm length 25mm width

TM-5116 Wood Ring Clamp

Have you ever tried to file something too tiny to hold? How about wire? Enter the wonderful tool called a Hand Vise (AKA Ring Clamp). They are wooden vises with leather pads to protect your metal from scratches. Use it for holding work while you file, grind, drill or any other time you need a helping hand.

TM-5111 Horn Anvil

TM-5117 Wood Ring Clamp

Used for holding and securing rings in various positions while being worked upon. The ring clamp is a handy tool for holding rings to be filed, drilled or polished. Made from wood, this clamp holds the ring vertically between two leather pads. The pads are tightened and released from around the ring by turning the wing nut on the side of the clamp. Makes jobs such as soldering easy

TM-5121 Punch Dapping Sets

TM-5118 Bezel Roller

TM-5119 Carbon Ring Stand

TM-5124 Steel Bench Block

TM-5112 Jeweler Saw frame
The piercing saw or jewellers saw is a small and fretsaw styled saw that has fine blades. Capable of cutting wood and plastic they are mainly used on metal. The frame adjusts to extend the life of broken blades.

The blade is clamped into the saw frame with the teeth facing towards the handle so that the saw cuts when it is pulled, not like a conventional saw that cuts when it is pushed. It's used by jewellers, also has uses in model making and any metalworking that requires fine detail as well. Use with any of Zona's Jeweller's saw blades

TM-5129 Ring Clam

TM-5128 Prong Pusher

TM-5130 Universal Work Holder

TM-5122 Ring Cutter

TM-5101 Bracelet Mandrels

Four steps graduate from 1-3/4" x 2" to 2-1/2" x 2-3/4" (44 x 50mm to 63 x 70mm)

About Us

The Quality Management System of Master Surgical has been designed and implemented as a means of ensuring that products supplied to the customers are of the highest quality and in every instance meet the needs and requirements of the customers.

The quality and reliability of our products is the concern of every person in the organization and not just the sole responsibility of Quality Assurance personnel. Our skillful workers make sure that quality is maintained at each and every step of manufacturing.

We believe that our first responsibility is to the Doctors, Nurses, and Patients, to Mothers and Fathers and all those who use our Instrument. In Meeting their needs every thing we do must be of high quality.

It is an important requirement of the policy that our company would supply its customers with the products which are suitable for their intended purposes and which are in conformity with the relevant agreed specifications or contract. Wherever International Standard applies, our company ensures products supplied conform to the appropriate standards.

The procedures outlined in Master Surgical Quality Manual describe how the quality system is designed to ensure that customer requirements are recognized and that consistent control of those requirements are established, implemented and maintained.

Quality Control Manager,

Mr. Noman
